Amendments to the claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-23 (cancelled)

Claim 24 (currently amended): A paint roller comprising:

a paint applicator having a cylindrical outer surface and two opposite ends; and

two holder mounts, respectively associated with said two opposite ends, each of said holder mounts having a base surface and comprising: a journal[[],] protruding from said base surface in a direction away from said paint applicator[[],];

wherein said journal comprises comprising at least one a holder abutment and a hollow cylindrical protrusion extending from the holder abutment[[],];

wherein each of said at least one holder abutment having has a planar abutment surface substantially aligned on a common plane;  
wherein and the total area of said planar abutment surface for each of said journal is smaller than an axial cross-section of each of said holder mounts, said smaller total area achieved by a plurality of arc-shaped members disposed around said journal; and

wherein said hollow cylindrical protrusion forms a channel  
through which paint is channelled for storage within said paint  
applicator.

Claim 25 (cancelled)

Appl. No. 10/040,652

Amdt. Dated February 2, 2005

Reply to Office action of Feb. 27, 2004

Claim 26 (currently amended): The paint roller as claimed in Claim 2524, wherein said ~~at least one~~ holder abutment forms a ring surrounding said hollow cylindrical protrusion.

Claim 27 (currently amended): The paint roller as claimed in Claim 2624, wherein ~~said hollow cylindrical protrusion forms a channel with an inner wall having at least one circumferential ridge~~ said holder abutment is comprised of a plurality of arc-shaped members surrounding said hollow cylindrical protrusion.

Claims 28-34 (cancelled)

Claim 35 (currently amended): The paint roller as claimed in Claim 24, and further comprising an applicator holder having:

a handle; and

a fork having opposite sides, each of said opposite sides having a journal engagement portion.

Claim 36 (new): The paint roller as claimed in Claim 24, wherein said journal engagement portion comprises a loop for coupling to said journal, and said loop has a mount abutment surface that has an area larger than that of said planar abutment surface.

Claim 37(new): The paint roller as claimed in Claim 36, further comprising a cover for capping at least one of said holder mounts.
